

# ASL NA Meeting 2026, Sunday July 19

|               |                                                                                             |                        |                      |
|---------------|---------------------------------------------------------------------------------------------|------------------------|----------------------|
| 8:00 – 9:00   | Registration in Golkin Hall Lobby                                                           |                        |                      |
| 9:00 – 9:50   | Matthew Harrison-Trainor<br>Computable structure theory and infinitary logic (Tutorial 1/3) |                        |                      |
| 10:00 – 10:20 | Coffee in Davis Student Union                                                               |                        |                      |
| 10:30 – 11:20 | Nicholas Ramsey<br>NSOP <sub>1</sub> theories (Tutorial 1/3)                                |                        |                      |
| 11:30 – 12:20 | Jack Lutz<br>Effective fractal dimensions                                                   |                        |                      |
| 12:20 – 2:00  | Lunch                                                                                       |                        |                      |
|               | Computability Theory<br>S-240a                                                              | Model Theory<br>S-240b | Set Theory<br>S-245a |
| 2:00 – 2:20   | Jason Block                                                                                 | Blaise Boissoneau      | Nathaniel Bannister  |
| 2:30 – 2:50   | Neil Lutz                                                                                   | Matthias Stout         | James Cummings       |
| 3:00 – 3:20   | Peter Gerdes                                                                                | Atticus Stonestrom     | Victoria Gitman      |
| 3:30 – 3:50   | David Gonzalez                                                                              | Scott Mutchnik         | Siiri Kivimäki       |
| 4:00 – 4:20   | Valentina Harizanov                                                                         | Ronan O’Gorman         | Fanxin Wu            |
| 3:00 – 4:30   | Coffee (concurrent with talks) in Kabacoff Reading Room                                     |                        |                      |
| 4:30 – 5:20   | Lawrence Moss<br>How to not give up on logic                                                |                        |                      |
| 6:00 – 8:00   | Reception at the Penn Museum                                                                |                        |                      |

All talks in Fitts Auditorium unless otherwise stated. Further details at [awainverse.github.io/asl-nam-2026](https://awainverse.github.io/asl-nam-2026).
